BEST BANG FOR YOUR BUCK!

Orders can dropship from Huvepharma or be fulfilled by distribution. No substitutions will be honored. Product drop shipped must be ordered in full case quantity. VetCaps will be shipped as weather and temperatures permit during transit, to comply with label storage and handling requirements. Distributor must submit free goods report to customer service for reimbursement, on a monthly basis. This program can be changed at any time.

FINAL REIMBURSEMENT DEADLINE IS OCTOBER 31, 2019.

DESIGNATE A RETAIL PRO IN YOUR STORE...

Customers appreciate a store that is helpful and an informative source for the VetGun system which is important when selling this unique technology. Sign up a sales staff member today to become a VetGun Retail Pro. To receive the information packet and quiz, contact customer service.

PROG-0154 (Rev 1118)

OR LET THE DANGLERS DO THE TALKING

These brightly colored danglers are sure to grab the attention of your customers and help them find what they need with a quick glance. These shelf talkers are available upon request by contacting AgriLabs. They are just what your retail display needs for that kick of excitement. Also ask about our rental sign options.

PRODUCT INFORMATION

The precision insecticide delivery system for cattle.

EFFECTIVE IN-SEASON ROTATION PROGRAM WITH THE NEW AIM-A ABAMECTIN VETCAPS.

AiM-A VetCaps are 10 mL capsules containing abamectin (a macrocyclic lactone in the avermectin family), an Environmental Protection Agency (EPA)-registered insecticide for effective control of horn flies on beef cattle and non-lactating dairy cattle.

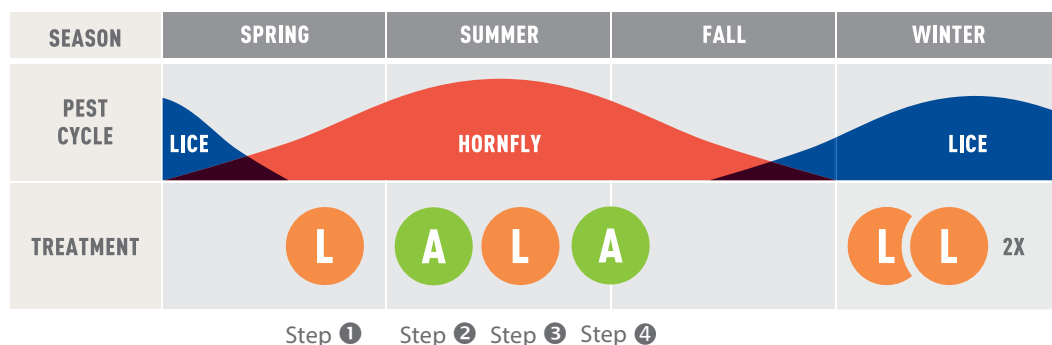

AiM-L VetCaps are 10 mL capsules containing lambda-cyhalothrin (a pyrethroid), an Environmental Protection Agency (EPA)-registered topical insecticide proven effective for control of horn flies and lice on beef cattle.

GET A ONE-TWO PUNCH ON HORN FLIES - CONTROL LICE

The following is a sample rotation schedule of how AiM-L and AiM-A VetCaps could be used for control of horn fly and lice if first treatment of the season is with an avermectin.

- Step 1:** Treat with AiM-L when flies start to appear
- Step 2:** Treat with AiM-A when flies approach approximately 200/animal
- Step 3:** Treat with AiM-L four weeks after AiM-A treatment
- Step 4:** Treat with AiM-A when flies approach approximately 200/animal

During winter and early spring, treat with 2x AiM-L two weeks apart to control lice.

● AiM-A ● AiM-L

Before using, read label information for use instructions, warnings and precautions.
